

## ArchDaily Building of the Year 2011

ArchDaily (<http://www.archdaily.com>) is currently the most visited Architecture website in the world with more than 200,000 daily readers who viewed 350 million pages during 2011. It features the latest projects, awards, contests and architecture related news. It holds a growing database of the latest projects from all around the world and gives firms from all size, the chance to be featured and promoted via their platform.

Last month, ArchDaily partnered with HP to launch a unique award for the international architecture community (<http://archdai.ly/boty11>). In these awards their readers have the chance to nominate and vote for the best projects featured in ArchDaily during 2011.

The first round featured more than 3,000 projects. Architects and readers from all over the world decided on their favorites and today, after more than 30,000 votes, the five finalists for each category were announced.

From small interiors to large scale buildings, designed by renowned practices and young architects, in different locations around the world, 70 projects remain in competition to win in one of the 14 categories. The community has the final word, and after the competition ends next February 15<sup>th</sup>, winners will be announced. The final nominees are:

## About ArchDaily

ArchDaily (<http://www.archdaily.com>) was founded in March 2008 with the one mission of delivering the most complete information to architects around the world; every week, every day, every hour, every moment: as soon as it is happening. It is the online source of continuous information for a growing community of thousands of architects searching for the latest architectural news: projects, events, interviews and competitions among others.

The editorial staff works in a daily basis with the most prestigious and influential architectural practices around the world in order to deliver specific and valuable content to the international architecture community. In one year ArchDaily has quickly established itself as one of the leading architectural websites in the world due to their editorial staff's meticulous understanding of what the audience is really looking for: the best architecture around the world, as soon as possible.

## About HP

HP is a technology company that operates in more than 170 countries around the world. They explore how technology and services can help people and companies address their problems and challenges, and realize their possibilities, aspirations and dreams. HP applies new thinking and ideas to create more simple, valuable and trusted experiences with technology, continuously improving the way our customers live and work.
