PwC Luxembourg sponsorship helps Kids Life Skills expand class offer
Starting this January, kids coding classes are offered in the PwC Luxembourg Academy in Cloche D'Or

Luxembourg City: Kids Life Skills ASBL, a non-profit organization that offers logical thinking and computer coding classes to children ages 4-13, has recently expanded into new state-of-the-art facilities at PwC Luxembourg headquarters in Cloche D'Or. As part of a new partnership that kicked off in December 2019, the organization has been granted exclusive weekend use of the entire PwC Academy training facilities.

"PwC Luxembourg have generously given us use of their beautiful Academy space, which includes eight classrooms and a large comfortable lounge area for our parents to wait while enjoying coffee and snacks. This has also allowed us to offer our activities to many more children and grow from seven to twelve groups. Most importantly, it has given us the possibility to enable children from low income families to access our classes.

We would like to thank the team at PwC and especially Tal Ribon, John Parkhouse, Territory Senior Partner and CEO, Valerie Arnold, Partner, Bjorn Mertes, Facility Manager, Maria Bravo, Diversity Officer and Isabelle Durand, Communication Manager, for believing in us and going above and beyond to make sure the kids will have the best place to develop their logical thinking, problem solving, self-learning, creativity and teamwork through coding."

- Adi Berland, CEO, Kids Life Skills

-"Kids Life Skills is a great initiative, which fits our Upskilling and Digital agenda and at the same time gives us another opportunity to contribute to society, support integration and provide new skills to our next generation."
- Tal Ribon, Partner, PwC

Kids Life Skills was launched by FinTech expert and entrepreneur Ronen Even Tzur in December 2018 with three classes in English to introduce children to the concepts of logic, programming and algorithms through interactive, hands-on games and activities. In just one year, the organization has grown to a team of thirteen, including ten coding instructors and coaches, with twelve groups of children taught in English, French, and Luxembourgish. With the next trimester beginning in April 2020, the organization will also fulfil one of its major goals of inclusiveness, making class fees affordable for low income families to make sure that every child who is interested can join, enjoy and learn from their activities.

For additional information we welcome parents and children to come to our free information sessions on March 1st. 2020:

March 1st at 15:30 for ages 7-10 and 11-13: Coding and logical thinking for kids! Parents & Kids info session (7-13 yo)
Registration link:
